**CITATION NO 01_75_18C_024_4500312_22 TOTAL COLIFORM MAXIMUM
CONTAMINANT LEVEL VIOLATION FOR THIRD QUARTER 2018, SYSTEM NO. 4500312**

The California Health and Safety Code (hereinafter "CHSC"), Section 116650 authorizes the Shasta County Environmental Health Division (hereinafter "SCEHD"), to issue a citation to a public water system when the SCEHD determines that the public water system has violated or is violating the California Safe Drinking Water Act (hereinafter "California SDWA"), (CHSC, Division 104, Part 12, Chapter 4, commencing with Section 116270), or any regulation, standard, permit, or order issued or adopted thereunder.

The Igo Inn Water System failed to meet bacteriological domestic water quality standards during the third quarter of 2018. Five of six water samples collected during the third quarter were positive for total coliform bacteria. This is a violation of Title 22, California Code of Regulations (CCR), Article 3, Section 64426.1(b). The standard is that no more than one sample per quarter may do so.

Section 64464.1, Title 22, CCR, specifies that the SCEHD shall direct the water supplier to provide public notification for the third quarter 2018 water quality failure. The water system shall give notice by posting a notification in conspicuous locations throughout the area served by the water system and by publication in a local newspaper or newsletter distributed to customers, by internet posting of the notice or by direct delivery to each customer served by the Igo Inn Water System. The notice shall remain posted for a minimum of seven (7) consecutive days. The enclosed notice titled "Important Information about Your Drinking Water" is the public notice that you shall give to all water users and post to fulfill the above notification requirements.

Within 45 days of receipt of this letter, you are required to send this office a signed statement which indicates the date the notice was posted. Completing and returning the enclosed "Certification of Completion of Public Notification" form fulfills this requirement. Please also include what corrective action was taken to prevent such failures in the future and the cause of the failure if known.

Note that Section 116577 of the SDWA provides for the SCEHD to be reimbursed by the public water system for costs incurred for preparing and issuing public notifications to that system. In accordance with Section 116577, the water system will be billed for the preparation and issuance of this letter and notification. Approximately one-hour was spent preparing this letter and notification, and currently our costs are \$129.83 per hour. You shall submit a check in the amount of \$129.83 to SCEHD.

"Any person who is aggrieved by a citation issued by the SCEHD may file a petition with the State Water Resources Control Board (State Water Board) for reconsideration of the citation. Petitions must be received by the State Water Board within 30 calendar days of the issuance of the citation. The date of
